

Low Density Residential

Future Land Use Plan Category Description

Res. No. 10-23-18A

Description

Low-density residential areas include detached single-family residential properties with a typical density of 3-8 units per acre. While lot size and overall density may vary from one part of the city to another, these areas represent the predominant form of residential development in Bentonville. These areas may also include local amenities for residents, including neighborhood parks, places of worship, etc.
