

Don't Flush This

Basically, the only thing you should ever flush down a toilet is human waste (urine and feces) and toilet paper.

Here is a list of some of things to keep out of the toilet:

- Disposable diapers
- Tampons
- Cotton balls and swabs
- Mini or maxi pads
- Unused medications (put original containers in a plastic, zip-lock bag and throw the bag in the trash)
- Condoms
- Cleaning wipes of any kind
- Facial tissue
- Bandages and bandage wrappings

Things that should never be flushed or drained include:

- Paints and solvents
- Gasoline or combustible fuels
- Toxic chemicals
- Antifreeze
- Medicines and pharmaceuticals
- Fats, oils, and greases
- Baby wipes
- Needles and razor blades
- Pesticides, herbicides, and fertilizers
- Poisons including rat/mice bait

Things that we should avoid sending to the sewer include:

- Large amounts of food waste through the disposal
- Substances or objects that could plug a line and cause backups
