R-2, Medium Density Two Family and Townhome

The R-2 District encourages the basic land use restrictions as the R-1 District. It allows slightly higher population density than the R-1 District, with residential and related uses separated from commercial and industrial activity. Such a district shall encourage and maintain duplex and patio home development at appropriate locations. The R-2 District has a dual purpose. First, the district should provide areas for the development of two-family residential structures. Second, the district should facilitate conversion of one family residences to two-family use in established developed areas. The district may be located in developed areas or undeveloped areas of the City where an environment compatible with moderate density residential development can be established. Such a district can also be located in medium density areas where conversion may facilitate their continuation as a desirable area.

Maximum Height Allowed: 36 feet

Minimum Street Frontage: Equal to min. lot width required at building line, except for lots fronting on cul-de-sac turnarounds and on curving street frontages, which must have no less than 20 ft. of street frontage with the two side lots lines intersecting the street diverging until they are separated by the min. required lot width at the building line.

Minimum Width of Corner Lots: 75 ft. at building line.
